Dear Attorney General Ashcroft:

Congratulations on achieving the long awaited settlement on the Microsoft anti-trust lawsuit. Your efforts and desire to find the compromise and balance for the technology industry is greatly appreciated. The lawsuit should never have happened and the economy and innovations can now begin to progress again.

As a legislator I am always concerned with economic opportunities. Utah is a technology state and we need to start generating interest again in creating new products and ideas. Resolution of concerns for the Microsoft competitors is needed. It appears that AOL, Oracle and Apple have all had their concerns addressed. I highly support the settlement and hope that you will bring this issue to a close.

Sincerely,

David Ure
